

## **MacB – furniture chameleon.**

Mac B. is a piece of furniture similar to chameleon. Universal form of this armchair allows to combine it with different sofas and corners. Mac B. can also be an attractive “soloist” - next to a fireplace, in a house library, close to hi-fi equipment. It is worth to risk and choose interesting, extraordinary upholstery – vivid red or a leather with coat. In such “attire” this comfortable furniture will gain completely different expression. Soft cushions of seat and back are a guarantee of comfort and the solid, metal base provides stability. Mac B. is very simple in use thanks to its revolving mechanism.

## **Marek Gawlik**

Associated with Iker from the day it was established. The company’s focus on creating its own unique furniture style allowed him for unhindered approach to design and putting form and function before structure. It was him who prepared complete project documentation and who carefully monitored making prototypes, having in this way full control over the entire production process and its final results.
